HOW TO CHANGE DNS SETTINGS
|	
	Click the search box displayed at the left bottom in the task bar and enter **Control Panel**.
	Click on the **Control Panel** displayed at the top of the search box.
	Click on **View network status and tasks** under **Network and Internet**.

	The **Network and Sharing Center** window will appear. Click on **Change adapter settings** at the left side of the column.
	The **Network Connections** window will appear. Right click on **Ethernet** and select **Properties** from the list.
	The **Ethernet Properties** dialog box will appear. Make sure the **Networking** tab within the dialog is selected. From the list which appears, select **Internet Protocol Version 4 (TCP/IPv4)**. Then click the **Properties** button.
