

HOW TO DELETE PROXY SETTINGS

	<p>From the home screen, tap Settings.</p>
 <p>The screenshot shows the Settings app with the Wi-Fi section selected. The 'KGU-WLAN' network is checked and highlighted with a red box. An information icon (i) is also highlighted with a red box.</p>	<p>On the Wi-Fi page, make sure the KGU-WLAN is checked and tap  button on the right.</p>
 <p>The screenshot shows the Wi-Fi settings for the 'KGU-WLAN' network. The 'Configure Proxy' option is highlighted with a red box. A red arrow points from the 'Configure Proxy' option to the 'Configure DNS' option above it.</p>	<p>On the KGU-WLAN page, scroll down to the HTTP PROXY. Tap Configure Proxy.</p>

 <p>The screenshot shows the 'Configure Proxy' screen. At the top left is a back arrow and 'KGU-WLAN'. The title is 'Configure Proxy' and there is a 'Save' button at the top right. A list of proxy modes is shown: 'Off', 'Manual' (which has a blue checkmark), and 'Automatic'. Below this, there are two text input fields labeled 'Server' and 'Port', both of which are enclosed in a red rectangular box. At the bottom, there is an 'Authentication' section with a toggle switch that is currently turned off.</p>	<p>Delete the entered information for Server and Port.</p>
 <p>This screenshot is similar to the one above, but the 'Manual' option is no longer selected. Instead, the 'Off' option is selected, indicated by a blue checkmark. The 'Off' option is enclosed in a red rectangular box. The 'Server' and 'Port' fields are no longer visible. The 'Save' button at the top right is also enclosed in a red rectangular box.</p>	<p>Change from Manual to Off for HTTP PROXY, and Save.</p>
